THE STORY

Little Pig is a
dream
realised

It's about focus and attention to the little things that are infinitely the most important.

In 2011, motivated by the staggering number of unemployed youth in the Eastern Cape, particularly in the IT sector, Siviwe established LITTLE PIG in the computing and consulting space. The big idea driving LITTLE PIG is to identify and bring on board promising unemployed graduates - direct their passion, mentor them one-on-one, and harness their potential to create a unique force for the development of superior, customised solutions for clients' IT requirements.

Working with the team at LITTLE PIG, interns gain superior skills and the experience required to become highly proficient in the IT industry.

LITTLE PIG is a specialised niche player in the fields of network management and security and consulting services.

A constantly learning organisation, embracing learning and change, LITTLE PIG has adopted the SCRUM project management methodology internally to maximise communication and ensures inclusion.

VALUES

LITTLE PIG is a 100% black, privately owned and managed computing and consulting company, headquartered in the Eastern Cape of South Africa.

Whether dealing with clients, partners, advisers or fellow consultants LITTLE PIG's approach is flexible. With a young dynamic, highly skilled team of professionals and passionate interns, LITTLE PIG exceeds all expectation.

LITTLE PIG's values centre around being a highly flexible, constantly learning organisation - with its core value being keeping promises!

VALUE PROPOSITION

- Black owned and managed enterprise
- Young, dynamic, vibrant and professional
- Strong partnerships to deliver value
- Focus on skills development and job creation
- Small, professional, highly skilled team
- Strong track record

TEAM

The quality and superior skills of the team is the key to LITTLE PIG's success. The team collaborates with clients - with a dynamic buzz, a wealth of innovation and a distinct lack of bureaucracy - to produce efficient, informed and innovative results.

The Little Pig team embraces the philosophy encapsulated in the Agile manifesto that states:

- Individuals and interactions over processes and tools
- Working software over comprehensive documentation
- Customer collaboration over contract negotiation
- Responding to change over following a plan.

Teams that embrace Agile realise the need for small focused groups working together to achieve a common goal. For this reason LITTLE PIG keeps the team small and is content to be a niche player delivering exceptional service to an intentionally small client base.

SIVIWE KWATSHA (M.Inst.D) - Managing Member

BSc (Computer Science, Biochemistry)

BSc Hons (Computer Science)

Experienced businessman with extensive high-end ICT services experience, specialising in ICT security, governance, network and solutions architecture.
